

BATTLE OF THE TECH BANDS

VIDEOGRAPHER BRIEF · BRISBANE 2026

Make them feel like *rock stars.*

Battle of the Tech Bands is a community charity music event where tech-industry bands compete live on stage for Youngcare. We're inviting videographers to capture the energy, the noise and the vibe of the night — and we want your art to lead. This brief sets out our creative intent, the shots we need, and how we credit and promote your work.

THE EVENT

Thursday 27 August 2026 · The Triffid, Brisbane

PREPARED BY

battleofthetechbands.com

01 What we're about

We put on a genuine rock show. Four to six tech-industry bands, real instruments, a real crowd, and a room that gets loud. Our job with video is to make the people on that stage **feel like rock stars** — and to give the crowd a night they want to relive.

Your creativity leads. We are not after sterile corporate coverage. We want originality, a point of view, and a signature. Get on stage, get into the thick of the crowd, chase the light and the energy.

We're a charity, and honest about it. We keep costs low and are sometimes limited by what sponsorship provides. That's exactly why we offer a menu of options — pitch what fits your kit and your rate.

We back local artists. Supporting up-and-coming photographers and videographers is part of why this event exists. We promote the people who shoot it — see page 8.

We shoot for reuse. Footage promotes future events, so timeliness and technical reliability genuinely matter. Where we're specific, it's from experience — not to box in your craft.

02 See the work we make

Before you quote, spend ten minutes with our back catalogue — full sets, highlight reels and vertical shorts. It's the fastest way to read the tone, pace and energy we're after.

03 What lands best

Not a formula — just the moments our audience reacts to most. Use it as a starting point, then make it yours.

THE MOMENTS

- ◆ The **big musical peaks** — solos, key changes, the crowd singing back
- ◆ The **winner reveal** and the reaction that follows
- ◆ **Crowd energy** — hands up, faces, the pit

THE FEEL

- ◆ **Pace with the music**; let the loud moments breathe
- ◆ Frame **vertical-safe** so reels crop cleanly from horizontal
- ◆ **Real audio up front** — the room, the roar, the band

04 The event

The Triffid, Brisbane · typically draws 400–500 people · running since 2022.

DATE	VENUE	FORMAT	CROWD
Thu 27 Aug 2026	The Triffid Newstead, Brisbane	5 bands 25–30 min sets, ~10 min gaps	400–500 general admission

RUN OF SHOW *(indicative — confirmed closer to the date)*

2:00–6:00pm	Soundcheck & setup — your window to load in, lock safe camera positions, run cabling, and grab B-roll of the empty room.
6:30pm	Doors open — crowd arrivals, atmosphere, sponsor and charity signage.
Evening	5 band sets , plus MC remarks and sponsor & charity remarks between sets — all to be captured.
~11:00pm	Closing award presentation — the winner reveal is a key moment. Do not miss it.

05 Scope & pricing

Please quote each line separately. Listed roughly in order of priority — take on what suits your kit and rate.

SERVICE

1 Footage only **REQUIRED**

Multi-camera capture of the full show — four angles (wide, two angled, one roving), run by a small crew: one roving operator plus a producer/operator on the fixed cameras. Full technical spec on page 6.

2 Reels & highlights **ADD-ON**

Six reels — one event overview plus one per band. Backed by the studio original of the song the band covered (e.g. a band covering Rage Against the Machine → the RATM original), not the live mix — kept to ≤60s for fair use, so they're never blocked on our audio. Horizontal source, vertical-safe framing.

3 Multitrack audio **ADD-ON**

The Triffid's desk has no multitrack outs, so the incoming feeds need to be split (a splitter/snake on the inputs) into a recorder — handed off as .wav files. A dedicated tech to monitor the record is optional. Record only; we mix and master in-house, and we'll supply input lists per act a few days out.

4 Full edited show **IF AVAILABLE**

The complete show edited from multicam, including grading — delivered as an editor project plus a final rendered master (see note below).

EDITING TOOLS — PREMIERE OR RESOLVE

We're glad to take either — cut in **Premiere Pro** or **DaVinci Resolve**. Deliver a standard interchange (**FCPXML** / **Premiere XML** / **AAF** / **EDL**) that relinks cleanly, alongside the graded media and the final rendered master. We archive in Resolve, so a Resolve project is welcome — but never required.

06 Equipment

WE CAN HIRE IN — TELL US WHAT LIFTS THE RESULT

If additional gear would meaningfully improve coverage, **recommend it and we'll look at hiring it in**. Hire costs factor into our final decision on pricing, so flag what's essential versus nice-to-have — feel free to quote with and without recommended hire so we can compare.

07 Footage — the shots

Everything filmed horizontally, with framing mindful of vertical reuse. Extra angles are always a bonus.

1 · WIDE — FULL STAGE

- ◆ Ideally **6K** to maximise post digital zoom
- ◆ Locked and stable; covers the whole stage for the full show

2 · TWO ANGLED CAMERAS

- ◆ Shooting **towards the stage**, typically from the left and right
- ◆ Tighter performer coverage to intercut with the wide

3 · ONE ROVING CAMERA

- ◆ Roams the **photo pit** between stage and barricade — free to spin back for crowd reactions
- ◆ Up on stage for a few grabs each set for the reels — get amongst the action

+ BONUS ANGLES

- ◆ **Slider or behind-the-band**, crowd-facing angles are gold
- ◆ Any additional angles welcome — surprise us, originality is the point

08 Delivery & capture spec

FORMATS & MEDIA

- ◆ Raw footage **minimum 4K**, in Log or Blackmagic RAW
- ◆ **24 fps** base rate — set shutter to avoid flicker under stage lighting (25 fps is fine); higher rates welcome for slow-mo B-roll
- ◆ Delivered on an **SSD we provide**
- ◆ Where a format lacks camera metadata, include **camera make & model**

AUDIO

- ◆ **All video must include audio** for syncing — set sensible levels
- ◆ Taking the multitrack line (page 5)? You capture the desk split; we'll send input lists a few days out
- ◆ We also run our own board + mic recording (Zoom) as backup and to mix in a little crowd

RELIABILITY & CONSISTENCY ON THE NIGHT

- ◆ Record to **dual cards / backup** where your camera supports it
- ◆ Keep **white balance & picture profile matched** across cameras for cleaner multicam grading
- ◆ Mind **camera vibration** in your setup and mounting
- ◆ Check cameras **between sets** for overheating / shut-off
- ◆ Confirm cards are recording and levels are healthy after each changeover
- ◆ Have a **redundancy plan** for the winner reveal and key moments

09 Deliverables & timelines

Value declines the further we get from the event, so timeliness matters — but the dates below are a starting point, not a deadline wall. We agree what works up-front, and earlier is always appreciated.

Mon 31 Aug 2026

All footage — every camera

Minimum 4K Log / BRAW on the supplied SSD, with audio. Multitrack .wav files (if booked) on the night or with this hand-off.

Tue 1 Sep 2026 · morning

Event highlight reel ×1

The hero cut we push out first, while the buzz is fresh. Backed by the studio original of a covered song (≤60s, fair use), so it's not waiting on any mix.

Rolling — from Tue 1 Sep

Winning-band reel ×1

Winner announced on the night; their reel follows quickly, backed the same way.

Fri 11 Sep 2026

Remaining band reels ×4

The four other bands, by the Friday about two weeks on. Deliver individually as they're ready.

10 Ownership & usage

WE OWN THE WORK — YOU'RE FREE TO SHOW IT

You're paid to create it, so BOTTB owns the footage and edits — and we keep that fair:

- ◆ **Use your own work, always** — feature anything you shoot for us in your portfolio and showreel, crediting BOTTB.
- ◆ **Published under CC BY-NC 4.0** — like all media on our site, released for non-commercial use with attribution to you, so it gets seen and shared.
- ◆ **Commercial use stays with us** — and if a paid or commercial opportunity for the work comes up, we'll come to you first.

11 Delivery & payment

FLEXIBLE ON DATES, SIMPLE ON PAYMENT

- ◆ **Delivery dates are negotiable** — the dates above are what we'd love, agreed with you up-front. A heads-up keeps everything flexible and we can almost always shuffle a date.
- ◆ **No penalty clauses baked in** — we'd rather get the timing right together than dock a fee. Anything that waits on us (audio, a hero song, an asset we owe you) never counts against your timeline.
- ◆ **50% deposit** to lock the date, balance on delivery; edited finals are released once payment clears. Standard, and negotiable.

12 What you get from us

Supporting local artists is part of the point. Beyond your fee, we actively promote the people who shoot the event.

PROMOTION

- ◆ A profile on our **videographers page**, alongside our photographers
- ◆ Your work seen across our event and band pages

CREDIT & COLLABORATION

- ◆ Added as a **collaborator** on Instagram posts
- ◆ **@mentioned on LinkedIn** for video posts

13 How to quote

Send us a short reply covering the following. No formal proposal needed — a clear email is perfect.

- ◆ A **price per service line** (1–4, page 5)
- ◆ Any **recommended gear hire** (essential vs nice-to-have)
- ◆ A **showreel or portfolio** — ideally your live-music work
- ◆ Which **timelines** you can commit to
- ◆ Your **kit** — cameras, resolution, formats
- ◆ Whether you'd add **multitrack audio**
