

VIDEOGRAPHER BRIEF · SYDNEY 2026

Make them feel like *rock stars.*

Battle of the Tech Bands is a community charity music event where tech-industry bands compete live on stage for Youngcare. We're inviting videographers to capture the energy, the noise and the vibe of the night — and we want your art to lead. This brief sets out our creative intent, the shots we need, and how we credit and promote your work.

THE EVENT

Thursday 8 October 2026 · Manning Bar, Sydney

PREPARED BY

battleofthetechbands.com

01 What we're about

We put on a genuine rock show. Four to six tech-industry bands, real instruments, a real crowd, and a room that gets loud. Our job with video is to make the people on that stage **feel like rock stars** — and to give the crowd a night they want to relive.

Your creativity leads. We are not after sterile corporate coverage. We want originality, a point of view, and a signature. Get on stage, get into the thick of the crowd, chase the light and the energy.

We're a charity, and honest about it. We keep costs low and are sometimes limited by what sponsorship provides. That's exactly why we offer a menu of options — pitch what fits your kit and your rate.

We back local artists. Supporting up-and-coming photographers and videographers is part of why this event exists. We promote the people who shoot it — see page 8.

We shoot for reuse. Footage promotes future events, so timeliness and technical reliability genuinely matter. Where we're specific, it's from experience — not to box in your craft.

02 See the work we make

Before you quote, spend ten minutes with our back catalogue — full sets, highlight reels and vertical shorts. It's the fastest way to read the tone, pace and energy we're after.

03 What lands best

Not a formula — just the moments our audience reacts to most. Use it as a starting point, then make it yours.

THE MOMENTS

- ◆ The **big musical peaks** — solos, key changes, the crowd singing back
- ◆ The **winner reveal** and the reaction that follows
- ◆ **Crowd energy** — hands up, faces, the pit

THE FEEL

- ◆ **Pace with the music**; let the loud moments breathe
- ◆ Frame **vertical-safe** so reels crop cleanly from horizontal
- ◆ **Cut to the track** — land the hits on the beat of the song

04 The event

Manning Bar, University of Sydney · Sydney 2025 drew ~450 people · running since 2022.

DATE	VENUE	FORMAT	CROWD
Thu 8 Oct 2026	Manning Bar University of Sydney, Camperdown	5 bands 4 competing + special guest	450–650 general admission

RUN OF SHOW *(indicative — confirmed closer to the date)*

2:00–6:00pm	Soundcheck & setup — your window to load in, lock safe camera positions, run cabling, and grab B-roll of the empty room.
6:30pm	Doors open — crowd arrivals, atmosphere, sponsor and charity signage.
Evening	5 band sets , plus MC remarks and sponsor & charity remarks between sets — all to be captured.
~11:00pm	Closing award presentation — the winner reveal is a key moment. Do not miss it.

05 Scope & pricing

Two lines, quoted separately. Footage is the job; reels are an optional extra. We do the full-show edit and all audio production in-house.

SERVICE

1 Footage **REQUIRED**

Multi-camera capture of the full show. Static cameras (a locked wide plus angled cameras) and **at least one roving camera**. Crew must include **at least one operator on the roving camera** and **at least one operator monitoring the static cameras** all night; a static rig left unattended isn't enough. Full spec on page 6.

2 Edited reels **OPTIONAL**

Six short reels cut from your footage: one event overview plus one per band. Editing rules below.

REEL EDITING RULES

- ◆ **Use the pre-recorded track.** Every band plays covers, so a reel can simply run over the original studio recording of the song they covered (a band covering Rage Against the Machine → the RATM original). No live audio to sync, and nothing to wait on from us.
- ◆ **≤60 seconds**, horizontal master with **vertical-safe framing** so it crops cleanly to 9:16.
- ◆ **Deliver a rendered file** in any editor. No project files, grading handover or full-show cut needed.

06 Equipment

WE CAN HIRE IN — TELL US WHAT LIFTS THE RESULT

If additional gear would meaningfully improve coverage, **recommend it and we'll look at hiring it in**. Hire costs factor into our final decision on pricing, so flag what's essential versus nice-to-have — feel free to quote with and without recommended hire so we can compare.

07 Footage — the shots

Everything filmed horizontally, with framing mindful of vertical reuse. Extra angles are always a bonus.

1 · STATIC WIDE — FULL STAGE

- ◆ Ideally **6K** to maximise post digital zoom
- ◆ Locked and stable; covers the whole stage for the full show

2 · STATIC ANGLED CAMERAS

- ◆ Shooting **towards the stage**, typically from the left and right
- ◆ Tighter performer coverage to intercut with the wide; typically two, more welcome

3 · ROVING CAMERA AT LEAST ONE

- ◆ **Amongst the action, up close**: on stage with the band, right in behind the **drummer**, and down in the pit and the **crowd**
- ◆ Runs all show and cuts into the **full-set videos**, not just the reels

CREW · MINIMUM TWO

- ◆ A **roving operator**, plus an operator monitoring the **static cameras** for the whole show: framing, recording, battery, heat
- ◆ Bonus angles (slider, behind-the-band, crowd-facing) always welcome

08 Delivery & capture spec

FORMATS & MEDIA

- ◆ Raw footage **minimum 4K**. Log or RAW welcome but **not required**; a standard profile is fine
- ◆ **24 fps** base rate — set shutter to avoid flicker under stage lighting (25 fps is fine); higher rates welcome for slow-mo B-roll
- ◆ Delivered on an **SSD we provide**
- ◆ **Camera metadata required** for colour matching: keep it in the files, or send a sheet per camera (make & model, picture profile, colour space, white balance, ISO, shutter)

AUDIO

- ◆ **All video must include audio** at sensible levels. It's for sync only: no multitrack, desk feed or mixing needed
- ◆ We record the desk and room ourselves and handle all audio production

RELIABILITY & CONSISTENCY ON THE NIGHT

- ◆ Record to **dual cards / backup** where your camera supports it
- ◆ Check cameras **between sets** for overheating / shut-off
- ◆ Keep **white balance & picture profile matched** across cameras for cleaner multicam grading
- ◆ Confirm cards are recording and levels are healthy after each changeover
- ◆ Mind **camera vibration** in your setup and mounting
- ◆ Have a **redundancy plan** for the winner reveal and key moments

09 Deliverables & timelines

Value declines the further we get from the event, so timeliness matters — but apart from the raw footage hand-off, the dates below are a starting point, not a deadline wall. We agree what works up-front, and earlier is always appreciated.

Fri 9 Oct 2026 · the day after

All raw footage — every camera **REQUIRED**

Minimum 4K on the supplied SSD, with scratch audio and camera metadata. We start editing straight away, so this date is fixed.

Tue 13 Oct 2026 · morning

Event highlight reel ×1 **IF BOOKED**

The hero cut we push out first, while the buzz is fresh. Cut to the studio original of a covered song, so it never waits on a mix.

Rolling — from Tue 13 Oct

Winning-band reel ×1 **IF BOOKED**

Winner announced on the night; their reel follows quickly, backed the same way.

Fri 23 Oct 2026

Remaining band reels ×4 **IF BOOKED**

The other three competitors plus the special guest, by the Friday about two weeks on. Deliver individually as they're ready.

10 Ownership & usage

WE OWN THE WORK — YOU'RE FREE TO SHOW IT

You're paid to create it, so BOTTB owns the footage and edits — and we keep that fair:

- ◆ **Use your own work, always** — feature anything you shoot for us in your portfolio and showreel, crediting BOTTB.
- ◆ **Published under CC BY-NC 4.0** — like all media on our site, released for non-commercial use with attribution to you, so it gets seen and shared.
- ◆ **Commercial use stays with us** — and if a paid or commercial opportunity for the work comes up, we'll come to you first.

11 Delivery & payment

FLEXIBLE ON DATES, SIMPLE ON PAYMENT

- ◆ **Reel dates are negotiable** (raw footage the day after is not) — the reel dates above are what we'd love, agreed with you up-front. A heads-up keeps everything flexible and we can almost always shuffle a date.
- ◆ **No penalty clauses baked in** — we'd rather get the timing right together than dock a fee. Anything that waits on us never counts against your timeline.
- ◆ **50% deposit** to lock the date, balance on delivery; reels are released once payment clears. Standard, and negotiable.

12 What you get from us

Supporting local artists is part of the point. Beyond your fee, we actively promote the people who shoot the event.

PROMOTION

- ◆ A profile on our **videographers page**, alongside our photographers
- ◆ Your work seen across our event and band pages

CREDIT & COLLABORATION

- ◆ Added as a **collaborator** on Instagram posts
- ◆ **@mentioned on LinkedIn** for video posts

13 How to quote

Send us a short reply covering the following. No formal proposal needed — a clear email is perfect.

- ◆ A **price per service line** (footage, and reels if offered)
- ◆ Any **recommended gear hire** (essential vs nice-to-have)
- ◆ A **showreel or portfolio** — ideally your live-music work
- ◆ Which **timelines** you can commit to
- ◆ Your **kit** — cameras, resolution, formats
- ◆ Your **camera count and crew**: static cameras, roving, operators
